SUMMARY

Software Engineer with over 5 years of experience, specializing in Java and Kotlin, with expertise in frameworks such as Spring Boot, Quarkus, Ktor, JUnit, and tools like Docker and AWS. Specialized in building backend applications and microservices architectures. At Banco PAN, I improved an application's response time by 85% through code optimization and infrastructure adjustments. I develop using TDD methodology and have experience with CI/CD pipelines for production deployments. Led successful integrations between a CRM platform and external partners. Passionate about collaboration, innovation, and delivering scalable solutions.

TECHNICAL SKILLS

Programming Languages	Java, Kotlin, JavaScript
Databases	PostgreSQL, MySQL, Firebase
Frameworks	Spring Boot, Ktor, JUnit, NodeJS
Methodologies	Scrum, Kanban, TDD
Others	AWS, Docker, Git, GitHub Workflow, Jenkins

PROFESSIONAL EXPERIENCE

Senior Software Engineer November 2024 - Present CI&T, Remote

- Developed backend solutions for monetary and non-monetary fraud prevention at Banco PAN, a fully digital Brazilian bank.
- Worked in a microservices ecosystem using Spring Boot and Quarkus with Java 8, 17, and 21.
- Contributed to a system handling approximately 400 transactions per second (TPS).
- Designed and implemented critical components to meet regulatory requirements of the Central Bank of Brazil (BACEN).
- Participated in technical discussions focused on performance improvements, reducing an application's response time from 1400ms to 200ms (about 85% reduction).
- Monitored services using ElasticSearch and Dynatrace.
- Responsible for the development and maintenance of security and fraud detection solutions for all banking transactions.

Senior Developer May 2023 - October 2024

GEOvendas, Jaraguá do Sul, SC

- Led a team of developers in software maintenance to deliver urgent requests.
- Actively worked on corrective maintenance of Java, C# (.NET), and AngularJS solutions.
- Developed and led an integration project between a telephony service and a CRM platform.
- Deployed Java applications to production environments in AWS using a Jenkins pipeline.
- Gathered requirements and cost estimates for new demands with the product team.

Mid-Level Developer June 2021 - May 2023

GEOvendas, Jaraguá do Sul, SC

- Participated in the corrective maintenance team for Java, C# (.NET), and AngularJS solutions.
- Discussed technical improvements with the architecture team.

- Used AWS S3 for file storage and transfer between applications.
- Worked with Docker and Linux server infrastructure.
- Integrated applications via REST API with partner ERPs.
- Led a project to implement unit testing from scratch in legacy applications.

Junior Developer

October 2020 - June 2021

GEOvendas, Jaraguá do Sul, SC

- Worked on product development teams focusing on Java (Spring Boot and Vaadin), AngularJS, and PostgreSQL.
- Delivered weekly sprint releases using the SCRUM methodology.
- Collaborated with development and support teams to deliver requirements.

Development Intern

June 2020 - October 2020

GEOvendas, Jaraguá do Sul, SC

- Assisted the development team in Java applications with Spring Boot and Vaadin.
- Learned about relational (PostgreSQL) and non-relational (CouchDB) databases.

EDUCATION

Intensive English Program , EC English Language Centre (Vancouver, Canada)	2025 - 2025
Bachelor's Degree in Software Engineering , Universidade Católica de Santa Catarina	2020 - 2023
Technical Course in Internet Computing , SENAI/SC	2018 - 2019

LANGUAGES

- Portuguese - Native
- English - Advanced (B2)
